Even better than the first game. Very similar but also much more challenging. Highly recommended if you love tower defense games.. I love Paradox games but this is one of the best mainly due to the ease of entry. It's a simple to learn game, though I suspect like most Paradox games it'll be difficult to master.. Great ambient, scary music and a fascinating story.. I like the special atmosphere with the graphic design. This is typically the "just one more round" game. :) Special thanks for the Renault Alpine A310. One of my favorite car.. Crappy Game. Doesn't work properly and crashes all the time!!!. Imagine Advance Wars. Imagine Advance Wars with tedious controls and \u2665\

Not even once.. Update:

Now the game has base building which for me is great! It adds so much more to the game and the devs are still not finished! They have so much planned and I am convinced they will follow through with it all as they are very active and listen to the community:D

I have started a new series of gameplay videos: https://youtu.be/VcAo5m33tak

The new update is a huge game changer and brings exciting new elements to the game, highly recommended!

Old review:

"Seriously loving this game so far, what there is so far is very good and I can't wait for more content to be added. I very much recommend it, it's also very comfortable to play!

It may seem daunting at first and to be honest first plays can be real hard and seem unfair, but as with any survival games you get the hang of it. You learn to prioritise things, expand and craft things that increase your chance of survival. Stick with it and you will see for yourself.

Currently working on a series on Youtube, check it out"

https://youtu.be/TAw9oQCplUc. It's a cool game. Usually play it inbetween my dota games to ease my match making anxiety. The music is kinda good, suits with the game but it gets repetative after an hour or less, so I use my own playlist. Now the only thing I need is to find someone to play with.. Outstanding - top-notch physics and graphics, great selection of cars and tracks (plus many more added by the community), I prefer it to rFactor but it sadly isn't be used by many NZ racing leagues so I haven't played it lately...9V10

-----ENGLISH------

Nice old Russian game. Passage in 15 minutes of playing time, and a few hours of spiritual nostalgia. In this game should evaluate and Western players - is slightly open to them of the knowledge of Russian culture. Despite the old release date and some problems with the game - he's still able to bring pleasant moments of the passage.

So, the game is obligatory for those who remember the early 2000s and the first Russian quests. After purchasing it, we can pay tribute to the memories that we have associated with the development of computer games in Russia at that time.

Although it should be noted - it is very outdated Lots of bugs.. I really wanted to like this game more, but it just wasn't meant to be. The graphics are fantastic, as is the soundtrack, and the costumes Vpowers are a fun idea, but the zones just aren't that engaging. There's not much to collect or any good reason to explore, and aside from a few fun and challenging boss battles the game remains very easy for the vast majority of its 7-hour length. You've got infinite lives and health is almost never an issue (again, with the exception of some boss battles). To exaggerate a little bit, you could just keep running forward while spamming the action key, an approach that would quickly get you killed in a game like Sonic: no need for the player to feel engaged in any way, and it's only in the final two zones where you feel like you have to put some work into staying alive. More challenging modes are unlocked once you finish the game, but I had lost my interest by then. Also, the controls feel way too slippery for a platformer. (Note: This would be a "neutral" review if such were a possibility.). hey...it was almost free so its kay? also great mario spinoff tho:). Pros -

Intresting Idea

Graphics are not bad Cons -**Rubbish Controls** This is set in the England and we don't have that many crossroads Every Traffic Light is red so it gets boring Gets boring quickly Nice Selection of cars but needs things like taxi stickers and minivans and modern city cabs... I know this is an early access games so I like the idea but some Improvements will make it 10x better... Graphics **REAL LIFE** Really Good <-----Good Okayy Potato Minecraft Graphics Controls **BIEN** Good Okay Bad Really Bad <-----PC Power NASA PC Top Spec Mid Range Low end PC <-----Potato Toaster Microwave Difficulty GOD Pro Average N00b <----ur grandma can play this Price Bill Gates Cannot afford this Expensive - wait for a sale Over Priced For what it is <-----Normal Fair Price Cheap AF lol
